2006 Safety Inspection Manual

The 2006 Safety Inspection Manual can be purchased at the Safety Inspection Sales Office for \$5.00 beginning January 3, 2006. The manual may also be downloaded from the Safety Inspection web site, safetyinspections.utah.gov

Stations are required to have a printed copy of the manual at the station location, whether it is purchased at our office or down loaded from the internet. There are several changes to the manual; you will find changes in the Passenger Vehicle / Light Truck (PLT) manual under (A) Tires and Wheels. A new visual check for tire pressure has been added. Also added was a tire pressure check for 12-15 passenger vans. Clearly the passenger vans have an increased safety risk with low tire pressure. Currently there are vans, and SUVs, that were factory equipped with tint covering the 3rd brake light manufactured prior to 2003. B) Lighting – a new note has been added under (j) G. Check center high mounted stop lamp. This NOTE indicates that vehicles with original equipment manufacture, OEM tint, covering the 3rd brake light will pass safety inspection.

Replica Vehicles – Added section.

Low speed Vehicles– Added section.

NOTE: In order to make sure that your stations computer is connecting to the newest version of the safety inspection console, occasionally log into the following website. <http://uhpsi.dps.utah.gov/activex.html>

CREDIT CARD PURCHASES: The procedure for purchasing on-line certificates with a credit card **IS NOT AVAILABLE** at this time. There is no specific time frame scheduled for the availability of this option.

Please be patient, there are many pieces that need to fall into place for completion of the credit card sales option.

MAIL, MAIL, MAIL

We are still receiving mail addressed to our old address in Murray.

PLEASE

- Send reports, orders, and other communication to our correct address as displayed on this newsletter heading.
- Please dispose of previous Station Report Forms which display the Murray, Utah address.
